New fuel mandatory for all participants in the FIM CEV Repsol 2017

We inform you that there is a new fuel mandatory for all participants in the FIM CEV Repsol. The organization will continue with the policy of providing a space in the paddock for the sale of the new fuel 2017, the only official and authorized fuel in each event. The sale will be held in advance or in the paddock, and the collection will be held in the circuit. The price is €2.1 /liter and it is supplied in non-divisible 60 liter drums.

In order to facilitate your estimation of fuel liters to be provided at each event to which you have registered, we would very much appreciate it if you could fill out the attached form detailing your order of liters, your billing information and desired form of payment. The form should be sent to spain.fuelorder@panta.it

If you wish to have fuel in advance for possible private practices, you can get it by contacting: Roger Goyta / +34 654 22 63 36 / roger.goyta@panta.it

Remember that this official fuel is new in 2017 and will be mandatory during free and qualifying practices (Thursday, Friday and Saturday) as well as races. The penalty for not using the official fuel will be the exclusion of the event.
