

NOTE FOR TEAMS AND RIDERS

FURTHER INFORMATION ON 2022 Moto2™ European Championship: Triumph engines and other parts

As it was informed some months ago, the Moto2™ European Championship from 2022 will be open to Triumph using engines from the Moto2™ World Championship. These engines will be refurbished to last 3000km. Once an engine reaches that point, it will be at the end of its usable lifespan for the purposes of the Moto2™ ECh from 2022. The category will also be open to Honda engines and STK600 motorcycles in 2022.

Chassis for Triumph engines will have the same characteristics as in the Moto2™ World Championship and must be purchased on the open market.

However, there are a number of parts that will also be required and that will only be available for sale through the below suppliers. Those suppliers involved in this operation have indicated Dorna Worldwide (DWW) that the pricing is as follows:

EXTERNPRO		
Triumph engine	7.292 €	Contact: info@fimcevrepsol.com by using the purchase order .
FCC Clutch	1.760 €	
Initial Kit	1.093,10 €	

Engines aside, which shall only run for 3000km, the rest of the ese components have a much longer life span.

We would like to remind that the availability of the products sold by Externpro is limited and once the stock has been sold out there will not be engines available until the next season.

ECU and other parts

MECTRONIK		
Ecu MKE7	1.600 €	Contact: sales@mectronik.com Purchase: www.mectronik.store
