

## **NOTE FOR TEAMS AND RIDERS**

### **2022 Moto2™ European Championship: Triumph**

We would like to introduce Triumph engines to the Moto2™ European Championship from 2022, using engines from the Moto2™ World Championship. These engines will be refurbished to last 3000km. Once an engine reaches that point, it will be at the end of its usable lifespan for the purposes of the Moto2™ ECh from 2022. The category will, however, remain open to Honda engines and STK600 for the 2022 season at least.

Chassis for Triumph engines will have the same characteristics as in the Moto2™ World Championship and must be purchased on the open market. However, there are a number of parts that will also be required and that, like the engine, will be available for sale through Externpro and other suppliers.

The different suppliers involved in this operation have indicated Dorna Worldwide (DWW) that the pricing is as follows\*:

Triumph engine            7,292 €

FCC Clutch                1,760 €

Initial Kit                 1.050 €

Includes parts such as fuel injectors, air box, etc

ECU                         1,500 €

Included: IMU and lambda wide band option. Logger stick and dashboard not included

Wiring harness            1,100 €

Engines aside, which shall only run for 3000km, the rest of these components have a much longer life span.

Interested parties must reply to this email before the 20<sup>th</sup> of March 2021 using the attached form. The form must be filled in indicating the number of each component required. For operative purposes DWW will centralize all the initial requests from the Teams and then transmit them to the suppliers, it being agreed that the final commercial relation shall be between the Team and the relevant supplier. Engine availability is limited, only orders received before 20<sup>th</sup> March 2021 and formalized with the deposit before 20<sup>th</sup> April can be guaranteed. After 20<sup>th</sup> March new orders will only be considered if there are existences available.

A deposit of €4,000 must then be paid to the supplier of the engines before the 20th of April 2021. The bank details for this deposit will be provided once the attached form has been returned. If this deposit is not paid, the order is not valid.

The remaining balance must be paid before the delivery which is expected towards the end of 2021 or early in 2022. Any delivery charges incurred are to be paid by the buyer.

\* DWW shall not be responsible for any modification on the prices listed above by the relevant suppliers. Prices do not include sales tax.

Includes parts such as fuel injectors, air box, etc
